

# 2017 Taiwan's automotive electronics output value grows year by year

The estimated output value of Taiwan's automotive electronics

- In 2017, the output value of Taiwan's automotive electronics is expected to reach NT\$208 billion, and by 2020 it will exceed NT\$270 billion, which is equivalent to the output value of motor vehicles in Taiwan.
- Autonomous car and intelligent connected vehicles will promote the demand for products such as Advanced Driver Assistance Systems such as vehicle imaging systems, blind spot detection, lane departure warning systems, parking aid systems, and automotive LEDs.
